

RACKING ASSEMBLIES

DESCRIPTION

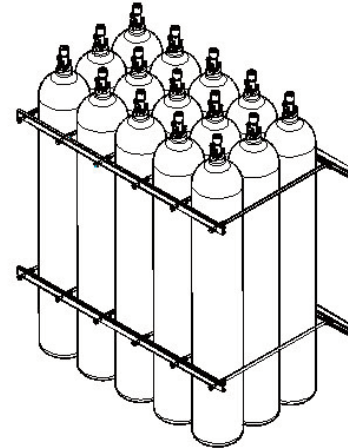

Cylinder Racking Assemblies are designed to support ProInert cylinder on multiple or main/reserve cylinder applications. Cylinder Racking Assemblies are available in single, double or triple row configurations. All necessary hardware and support material are supplied with each assembly.

Installation

Single Row Racking Assemblies utilise Unistrut and two-piece mounting straps as shown in Data Sheet C.2.35.01. Double and Triple Row Rack Assemblies utilise Unistrut as both the front and back supports together with Clamp Rod Assemblies to secure the cylinders to any structurally solid surface. Reference the ProInert Design, Installation, and Maintenance Manual, P/N 06-294, for racking installation details.

Material

- Back and Front Support: Steel Unistrut construction with Galvanised finish
- Mounting Hardware: Steel with galvanised
- Clamp Rod Assembly: (Double and Triple Row) Steel plated with plastic protective sleeve
- Cylinder Mounting Straps (Single Row): Carbon Steel, plastic coated
